

OWASP DEPENDENCY-TRACK

Community Meeting
August 2026

Organizational

- Community meetings are recorded and uploaded to [YouTube](#)
- Slides will be published in the [DependencyTrack/community](#) repository
- Please use the Zoom chat to ask questions during the presentation
- There will be an open Q&A section towards the end

Agenda

1. Recent releases
2. v5.1 release timeline
3. Helm chart v2
4. Guest presentation: Vivek Sahu @ Interlynk
5. Guest presentation: Elena Ströbele @ Rohde & Schwarz
6. Q&A

Call for Guest Presentations

- Want to brag about the cool DT setup you've built?
- Want to vent about what needs improvement?
- Want to get input on DT-related designs?
- Want to propose changes?

We'd love to host you here!

Past releases

- 4.14.3

- Released July 20
- VEX import performance improvements
- More efficient OSV mirroring
- Defect Dojo integration improvements
- Minor bugfixes and dependency bumps
- **Reminder: v4 enters end-of-life in December!**

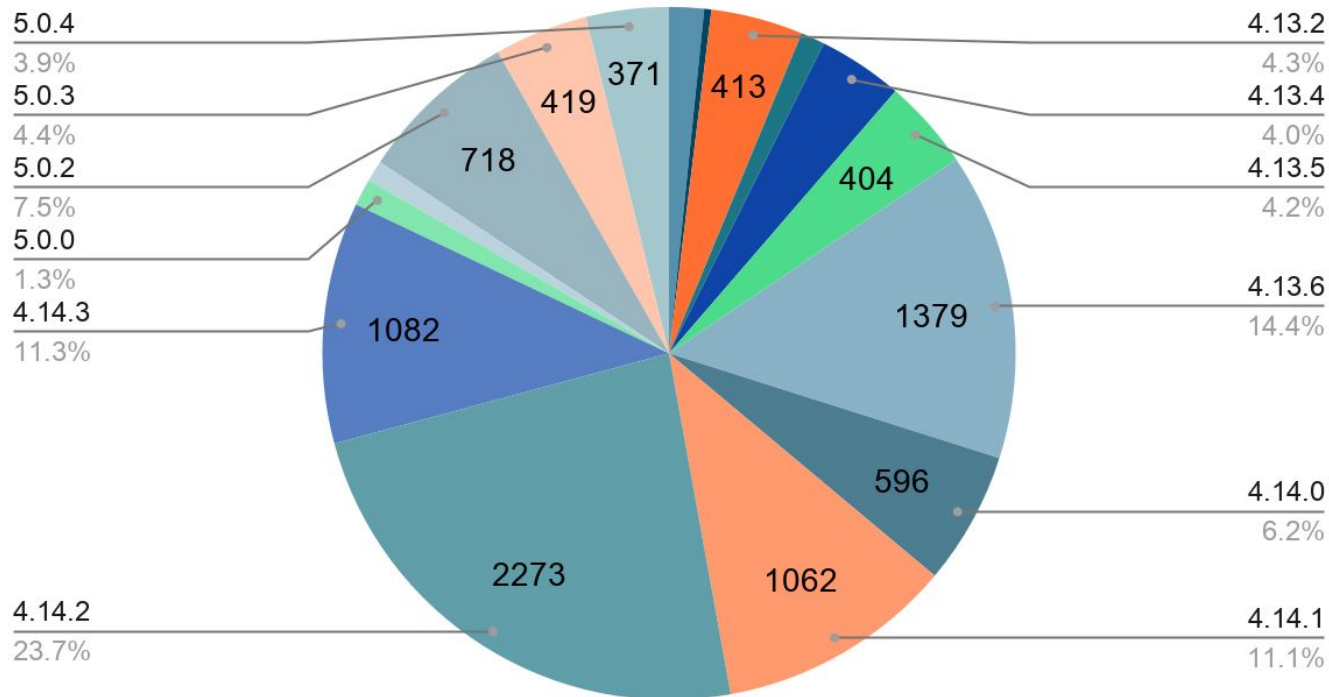

- 5.0.3

- Released July 20
- Improve classification of retryable vuln analysis errors
- Various query and task scheduling improvements
- Compatibility with Windows file systems
- ... and more!

Past releases

- 5.0.4
 - Released July 30
 - Various task scheduling performance improvements
 - Reworked heartbeating to prevent duplicate execution of long-running tasks
 - Enforcement of max execution duration for tasks
 - Improved efficiency for imports of BOMs with many components

Version Distribution (04.08.2026)

(Excluding unstable and custom versions)

v5.1 release timeline

- Originally aimed for release in late July
- Now targeting ~first half of August
- Headline features:
 - KEV support (CISA, ENISA, VulnCheck)
 - CycloneDX 1.7 support
 - See last month's community meeting for more!

Helm chart v2

- 2.0.0 released July 30
- Compatible with Dependency-Track v5, **not** v4
- Dependency-Track v4-compatible chart is maintained as version 1.x
- Please follow the upgrade guides for:
 - [Users upgrading from chart v1](#)
 - [Users upgrading from the *hyades* chart](#)
